

**Post-Doc and PhD Positions at the Institute of Evolution, University of Haifa, Haifa, Israel**

We are looking for independent, motivated, diligent, laborious, dedicated post-doctorate fellows for revealing the mechanisms of cancer-resistance and anti-cancer activity of the subterranean, blind mole-rat, *Spalax*. Our project has captured the interest of the scientific community and we have ample financial support for the studies. Generous fellowships (\$30K to \$40K according to qualifications and performance) are available, immediately, for experts in bioinformatics with a background of fully understanding biological questions, and for 'wet/bench' work, highly experienced in working with tissue culture, protein biochemistry and nude mice methodologies. Training in cancer research is an advantage. Experience of writing manuscripts for publication and solid publication record are expected. English skills both oral and written are required. American, Western-European or Israeli education is a benefit.

Outstanding candidates for PhD studies will also be considered (\$20K to \$27K according to qualifications and performance).

**Contact:** (<http://evolution.haifa.ac.il>). The applications should be submitted, together with extended CV and bibliography, summary of past accomplishments, and contact information of 3 referees, to Prof of Research Aaron Avivi ([aaron@research.haifa.ac.il](mailto:aaron@research.haifa.ac.il)) and Dr. Imad Shams ([imadshams@gmail.com](mailto:imadshams@gmail.com)).
